

DataBridge Systems

Information Security Policy

Policy Version: v1.0 **Effective Date:** June 1, 2026

TEST DATA — Fictional policy document created only for Policy RAG application testing.

1. Passwords

Employees must use strong unique passwords and must not share passwords with another person.

2. Multi-Factor Authentication

Multi-factor authentication is required for corporate email and other systems designated by Information Security.

3. Devices

Company data must be accessed through company-managed devices unless an approved exception exists.

4. Data Handling

Confidential information must only be shared with authorized recipients using approved company channels.

5. Incident Reporting

Suspected phishing, credential compromise, malware, or unauthorized data access must be reported to Information Security immediately.
